

# We revolutionize the way people identify themselves

*IdPlizz digitizes physical real-world photo ID such as a passport or driving license, then after checking its authenticity against multiple international databases, compares it to a 'selfie image' taken on the users' smartphone.*

*Our AI system then combines up to 11 other biometrics to fully and robustly verify any Individuals ID direct from their smartphone, delivered to you with our exclusive (patent pending) scoring result.*

## Designed to work everywhere ID Verification is Essential

### ONLINE

*Automatically verify the true ID of any individual, in real-time, as they perform any online action.*

### FACE TO FACE

*ID Verification to your CRM package, your IdPlizz portal or directly to an employees phone.*

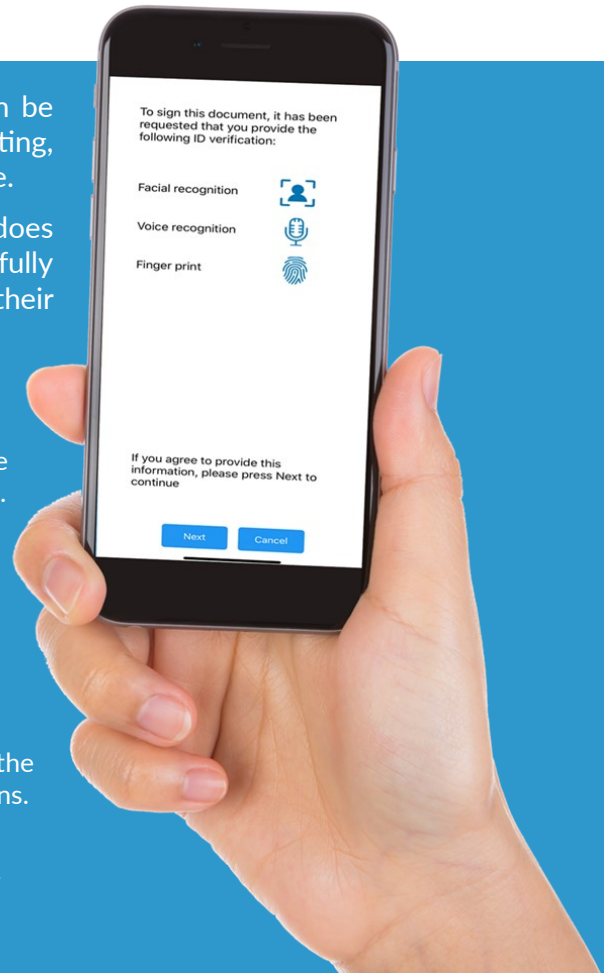

### BUSINESS

*From remote workers to CEO's, gain complete security and traceability of everyone using your IT systems.*

The user onboarding process is only completed once and then can be used again in the future to instantly verify their ID to you, in any setting, including linking their verified ID to an electronic document signature.

IdPlizz offers your clients the same level of safety and security as it does to enterprises, so your customers can rest assured that they are fully protected against all chances of ID fraud or cybercrime when using their IdPlizz digital ID.

### No IT Investment

Use your clients' phone to securely verify their ID.

### Blockchain Based

Secure encrypted storage for transactions and data.

### 1 in 3,000,000,000

The chance of a false positive being returned.

### Easily Integrated

API integration to your current CRM if required.

### White Label Option

100% customizable to your branding.

### Advanced AI

Remove human error in the processing ID verifications.
